

**Silent Killer:
AAA -
Are you at risk?**

ABDOMINAL AORTIC ANEURYSM - FREE SCREENING

Get a free ultrasound that may... save your life!

If you are over the age of 60, or over the age of 55, with a family history of Abdominal Aortic Aneurysm (AAA), you may be at risk for AAA.

AAA is among the top 13 leading causes of all deaths in the U.S. and the third leading cause of sudden death in American men. Males, specifically Caucasians, and those who have a history of smoking, high blood pressure, hardening of the arteries, high cholesterol or family history of AAA, are most at risk.

If an aneurysm is discovered before it ruptures, death may be prevented.

**Saturday, May 16
8 a.m. — 1 p.m.
LSU Healthcare Network
Baptist Medical Center
2820 Napoleon Avenue, Suite 890
New Orleans, LA 70115**
