

Your healthcare at your fingertips

LSU Healthcare Network (LSUHN) has partnered with LCMC Health for use of their electronic health record (EHR) known as Epic. This EHR implementation is through Epic's Community Connect program.

What is Community Connect?

Community Connect is a program that allows our independent ambulatory clinic to connect to LCMC Health's Epic. Our patients and providers will now have access to the preferred electronic medical record system used by more than 250 million patients worldwide. Furthermore, it improves patient care by allowing one chart to follow patients throughout the multiple areas in which they receive care.

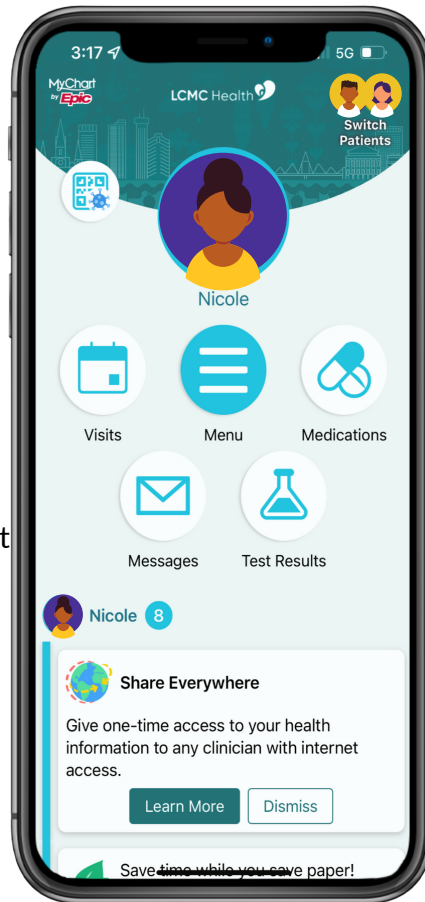

What if I see the same provider at a LCMC Health facility and a LSUHN facility?

- ✓ Your provider will have access to your one chart through Epic.
- ✓ You can select a provider and their location when sending a message through MyChart.

Charges may vary for the same provider depending on the facility and your insurance carrier.

How do I access my LSUHN patient portal?

- Log in to your **existing LCMC Health MyChart account** or create a new account.

Through your **LCMC MyChart account** you will have access to both your LCMC Health and LSUHN medical records--in one chart.

Can I pay my LSUHN bill through MyChart?

No, you cannot pay or view your LSUHN bill through MyChart.
